Journal of ATMOSPHERIC AND SOLAR-TERRESTRIAL PHYSICS

Editor-in-Chief: Timothy L. Killeen

Published in Association with the International Union of Radio Science

ELSEVIER

LIST OF CONTENTS

Number 1

D. Pancheva, N. Mitchell, H. Middleton and **H. Muller**: Variability of the semidiurnal tide due to fluctuations in solar activity and total ozone 1

V.M. Sorokin, V.M. Chmyrev and **A.K. Yaschenko**: Ionospheric generation mechanism of geomagnetic pulsations observed on the Earth's surface before earthquake 21

V.V. Surkov, O.A. Molchanov and **M. Hayakawa**: Pre-earthquake ULF electromagnetic perturbations as a result of inductive seismomagnetic phenomena during microfracturing 31

R. Ma, J. Xu and **H. Liao**: The features and a possible mechanism of semiannual variation in the peak electron density of the low latitude F2 layer 47

A. Pavelyev, T. Tsuda, K. Igarashi, Y.A. Liou and **K. Hocke**: Wave structures in the electron density profile in the ionospheric D- and E-layers observed by radio holography analysis of the GPS/MET radio occultation data. 59

S. Kamala, D. Narayana Rao, S.C. Chakravarty, J. Datta and **B.S.N. Prasad**: Vertical structure of mesospheric echoes from the Indian MST radar 71

A.H. Manson, C.E. Meek, Y. Luo, W.K. Hocking, J. MacDougall, D. Riggin, D.C. Fritts and **R.A. Vincent**: Modulation of gravity waves by planetary waves (2 and 16 d): observations with the North American-Pacific MLT-MFR radar network 85

R.R. Radick: Variability of sunlike stars 105

A. Bartzokas, S. Darula, H.D. Kambezidis and **R. Kittler**: Sky luminance distribution in Central Europe and the Mediterranean area during the winter period. 113

A. Taori, R. Sridharan, D. Chakrabarty, N.K. Modi and **R. Narayanan**: Significant upper thermospheric contribution to the O (^{1}S) 557.7 nm dayglow emission: first ground based evidence 121

J.E. Titheridge: Model results for the daytime ionospheric *E* and valley regions 129

Number 2

H.A. von Biel: The influence of neutral atmospheric dynamics on MF differential absorption results 139

S.K. Nair, K. Rajeev and **K. Parameswaran**: Wintertime regional aerosol distribution and the influence of continental transport over the Indian Ocean 149

K. Wilhelm: Past and recent observations of the solar upper atmosphere at vacuum-ultraviolet wavelengths 167

H.-S. Oh, C.M. Ammann, P. Naveau, D. Nychka and **B.L. Otto-Bliesner**: Multi-resolution time series analysis applied to solar irradiance and climate reconstructions. 191

D.V. Blagoveshchensky, O.M. Pirog, N.M. Polekh and **L.V. Chistyakova**: Mid-latitude effects of the May 15, 1997 magnetic storm. 203

M.N. Vlasov and **M.C. Kelley**: Modeling of the electron density depletion in the storm-time trough on April 20, 1985 211

Y. Zhao, A.Z. Liu and **C.S. Gardner**: Measurements of atmospheric stability in the mesopause region at starfire optical range, NM 219

X. Li, D.N. Baker, S. Elkington, M. Temerin, G.D. Reeves, R.D. Belian, J.B. Blake, H.J. Singer, W. Peria and **G. Parks**: Energetic particle injections in the inner magnetosphere as a response to an interplanetary shock 233

D.L. Wu, W.G. Read, Z. Shippony, T. Leblanc, T.J. Duck, D.A. Ortland, R.J. Sica, P.S. Argall, J. Oberheide, A. Hauchecorne, P. Keckhut, C.Y. She and **D.A. Krueger**: Mesospheric temperature from UARS MLS: retrieval and validation 245

Number 3

B. Singh, M. Hayakawa, P.K. Mishra, R.P. Singh and **D.R. Lakshmi**: VLF electromagnetic noise bursts observed in a borehole and their relation with low-latitude hiss 269

L.A. Hajkowicz and **H. Minakoshi**: Simultaneous observations of ionospheric quasiperiodic scintillations from short and long meridional baselines using VHF transmissions from Transit satellites 277

C.M. Huang: Quasi-periodic drift motions of meter-scale irregularities observed at the Chung-Li VHF radar 285

F.J. de Miranda, O. Pinto Jr. and **M.M.F. Saba**: A study of the time interval between return strokes and K-changes of negative cloud-to-ground lightning flashes in Brazil 293

O.K. Obrou, S.M. Radicella and **J.O. Adeniyi**: The equatorial electrojet and the profile parameters *B*0 and *B*1 around midday 299

A.J. Foppiano, X.A. Torres, M.A. Arriagada and **P.A. Flores**: Meridional thermospheric winds over the Antarctic Peninsula longitude sector 305

A. Taktakishvili, R.E. Lopez, L. Zelenyi, A. Greco, G. Zimbardo and **P. Veltri**: Ion dynamics in the magnetotail current sheet: opposite effects of magnetic turbulence and normal component 315

M.V. Ratnam, J.B. Nee, W.N. Chen, V.S. Kumar and **P.B. Rao**: Recent observations of mesospheric temperature inversions over a tropical station (13.5°N,79.2°E) 323

K. Minschwaner, T. Canty and **C.R. Burnett**: Hydroxyl column abundance measurements: PEPSIOS instrumentation at the Fritz Peak Observatory and data analysis techniques 335

R.C. Corney, G.B. Burns, K. Michael, A.V. Frank-Kamenetsky, O.A. Troshichev, E.A. Bering, V.O. Papitashvili, A.M. Breed and **M.L. Duldig**: The influence of polar-cap convection on the geoelectric field at Vostok, Antarctica 345

P.K. Shukla, M.A. Hellberg and **L. Stenflo**: Modulation of electron-acoustic waves 355

P.K. Bhuyan, M. Chamua, K. Bhuyan, P. Subrahmanyam and **S.C. Garg**: Diurnal, seasonal and latitudinal variation of electron density in the topside F-region of the Indian zone ionosphere at solar minimum and comparison with the IRI 359

Ya.V. Drobzheva and **V.M. Krasnov**: The acoustic field in the atmosphere and ionosphere caused by a point explosion on the ground 369

G.K. Mukherjee: Studies of equatorial F-region depletions and dynamics using multiple wavelength nightglow imaging 379

Number 4

V.V. Grimalsky, M. Hayakawa, V.N. Ivchenko, Yu.G. Rapoport and **V.I. Zadorozhnii**: Penetration of an electrostatic field from the lithosphere into the ionosphere and its effect on the D-region before earthquakes 391

V.P. Grozov and **G.V. Kotovich**: A comparison of results derived from scaling VS chirp-ionosonde ionograms with the international reference ionosphere (IRI) 409

A.D. Danilov, N.V. Smirnova, T.A. Blix, E.V. Thrane and **L.B. Vanina**: Some features of electron density behaviour in the high latitude D-region derived from *in situ* measurements 417

Y.I. Feldstein, L.A. Dremukhina, A.E. Levitin, U. Mall, I.I. Alexeev and **V.V. Kalegaev**: Energetics of the magnetosphere during the magnetic storm 429

V. Kopeikin: Artificial refraction of radiowaves in the ionosphere 447

J.W. Krzyścin, J. Jarosławski and **P.S. Sobolewski**: Effects of clouds on the surface erythemal UV-B irradiance at northern midlatitudes: estimation from the observations taken at Belsk, Poland (1999–2001) 457

G. Tsiropoula: Signatures of solar activity variability in meteorological parameters 469

D.M. Riggin, C.K. Meyer, D.C. Fritts, M.J. Jarvis, Y. Murayama, W. Singer, R.A. Vincent and **D.J. Murphy**: MF radar observations of seasonal variability of semidiurnal motions in the mesosphere at high northern and southern latitudes 483

Number 5

Sprites, Elves and their Global Activities

Y. Yair: A tribute to the astronauts of STS-107, who gave their lives in the pursuit of scientific research from space 495

M. Füllekrug and **Y. Takahashi**: Special Issue on Sprites, Elves and their global activities, Frankfurt am Main, Germany, 10 September 2002 497

SPRITE INITIATION

S.A. Cummer: Current moment in sprite-producing lightning 499

D.R. Moudry, H.C. Stenbaek-Nielsen, D. Sentman and **E. Wescott**: Imaging of elves, halos and sprite initiation at 1 ms time resolution 509

J.A. Valdivia: Comment on "Imaging of elves, halos and sprite initiation at 1 ms time resolution" 519

D.R. Moudry: Reply to comment on "Imaging of elves, halos and sprite initiation at 1 ms time resolution" 523

F.T. São Sabbas, D.D. Sentman, E.M. Wescott, O. Pinto Jr., O. Mendes Jr. and **M.J. Taylor**: Statistical analysis of space–time relationships between sprites and lightning 525

D.D. Sentman, E.M. Wescott, R.H. Picard, J.R. Winick, H.C. Stenbaek-Nielsen, E.M. Dewan, D.R. Moudry, F.T. São Sabbas, M.J. Heavner and **J. Morrill**: Simultaneous observations of mesospheric gravity waves and sprites generated by a midwestern thunderstorm 537

OPTICAL OBSERVATIONS

Y. Takahashi, R. Miyasato, T. Adachi, K. Adachi, M. Sera, A. Uchida and **H. Fukunishi**: Activities of sprites and elves in the winter season, Japan 551

R.R. Hsu, H.T. Su, A.B. Chen, L.C. Lee, M. Asfur, C. Price and **Y. Yair**: Transient luminous events in the vicinity of Taiwan 561

E.A. Gerken and **U.S. Inan**: Observations of decameter-scale morphologies in sprites 567

R. Miyasato, H. Fukunishi, Y. Takahashi and **M.J. Taylor**: Energy estimation of electrons producing sprite halos using array photometer data 573

E. Bucsela, J. Morrill, M. Heavner, C. Siefring, S. Berg, D. Hampton, D.R. Moudry, E. Wescott and **D. Sentman**: $N_2(B^3\Pi_g)$ and $N_2^+(A^2\Pi_u)$ vibrational distributions observed in sprites 583

ELECTROMAGNETICS

C.J. Rodger: Subionospheric VLF perturbations associated with lightning discharges 591

M. Sato, H. Fukunishi, M. Kikuchi, H. Yamagishi and **W.A. Lyons**: Validation of sprite-inducing cloud-to-ground lightning based on ELF observations at Syowa station in Antarctica 607

I. Nagano, S. Yagitani, K. Miyamura and **S. Makino**: Full-wave analysis of elves created by lightning-generated electromagnetic pulses 615

O. Soloviev: 3D modelling of VLF radio wave propagation in terrestrial waveguide allowing for localized large-scale ionosphere perturbation 627

INSTRUMENTS

Y. Yair, C. Price, Z. Levin, J. Joseph, P. Israelevitch, A. Devir, M. Moalem, B. Ziv and **M. Asfur**: Sprite observations from the space shuttle during the Mediterranean Israeli dust experiment (MEIDEX) 635

J. Kurihara, K.-I. Oyama and **Y. Takahashi**: Development of a spectrometer to measure the blue components of sprites 643

J.L. Chern, R.R. Hsu, H.T. Su, S.B. Mende, H. Fukunishi, Y. Takahashi and **L.C. Lee**: Global survey of upper atmospheric transient luminous events on the ROCSAT-2 satellite 647

Number 6

G.D. Aburjania, G.V. Jandieri and **A.G. Khantadze**: Self-organization of planetary electromagnetic waves in the E-region of the ionosphere 661

V.B. Ivanov and **M.V. Tolstikov**: Instability of the state of the night-time topside ionosphere 673

J.M. Vaquero, M.C. Gallego and **J.A. García**: Auroras observed in the Iberian Peninsula (1700–1855) from Rico Sinobas' catalogue 677

M. García-Fernández, M. Hernández-Pajares, J.M. Juan, J. Sanz, R. Orús, P. Coisson, B. Nava and **S.M. Radicella**: Combining ionosonde with ground GPS data for electron density estimation 683

I. Horvath and **E.A. Essex**: The Weddell sea anomaly observed with the Topex satellite data 693

H. Bencherif, T. Portafaix, J.L. Baray, B. Morel, S. Baldy, J. Leveau, A. Hauchecorne, P. Keckhut, A. Moorgawa, M.M. Michaelis and **R. Diab**: LIDAR observations of lower stratospheric aerosols over South Africa linked to large scale transport across the southern subtropical barrier 707

T. Farges, A. Le Pichon, E. Blanc, S. Perez and **B. Alcoverro**: Response of the lower atmosphere and the ionosphere to the eclipse of August 11, 1999 717

R.D. Piacentini, A. Cede and **H. Bárcena**: Extreme solar total and UV irradiances due to cloud effect measured near the summer solstice at the high-altitude desertic plateau Puna of Atacama (Argentina) . . 727

I.R.C.A. Pinto and **O. Pinto Jr.**: Cloud-to-ground lightning distribution in Brazil 733

O. Pinto Jr., I. Regina, C.A. Pinto, J.H. Diniz, A. Cazetta Filho, L.C.L. Cherchiglia and **A.M. Carvalho**: A seven-year study about the negative cloud-to-ground lightning flash characteristics in Southeastern Brazil 739

N.K. Sethi, R.S. Dabas, L. Singh, V.K. Vohra, B. Veenadhari and **S.C. Garg**: Results of foF2 and Ne-h profiles at low latitude using recent digital ionosonde observations and their comparison with IRI-2000. 749

T.D. Kaladze, O.A. Pokhotelov, R.Z. Sagdeev, L. Stenflo and **P.K. Shukla**: Planetary electromagnetic waves in the ionospheric E-layer. 757

A.R. Lawrence and **M.J. Jarvis**: Simultaneous observations of planetary waves from 30 to 220 km 765

S.B. Ganguli: Book review 779

International Geophysical Calender 2003 (FINAL). 781

Number 7

K.D. Cole: Return current and heat transport into zero-order SAR arcs 787

P. Laut: Solar activity and terrestrial climate: an analysis of some purported correlations 801

K. Niranjan, H.S. Sridhar, P.V.S. Rama Rao, S.C. Garg and **P. Subrahmanyam**: Evening enhancements in F-region electron temperature at subtropical latitudes during June solstice in the Indian SROSS C2 RPA data. 813

A.O. Soldatkin and **Yu.V. Chugunov**: Unipolar induction as the origin of generation of electric fields and currents in plasmaspheres of planets 821

J. Lilensten and **Lj.R. Cander**: Calibration of the TEC derived from GPS measurements and from ionospheric models using the EISCAT radar 833

Ch. Jacobi, D. Kürschner, H.G. Muller, D. Pancheva, N.J. Mitchell and **B. Naujokat**: Response of the mesopause region dynamics to the February 2001 stratospheric warming. 843

F. Ding, W. Wan and **H. Yuan**: The influence of background winds and attenuation on the propagation of atmospheric gravity waves 857

M.W. Liemohn and **J.U. Kozyra**: Lognormal form of the ring current energy content 871

Number 8

H.G. Mayr, J.G. Mengel, D.P. Drob, H.S. Porter and **K.L. Chan**: Modeling studies with QBO: I. Quasi-decadal oscillation 887

H.G. Mayr, J.G. Mengel, D.P. Drob, K.L. Chan and **H.S. Porter**: Modeling studies with QBO: II. Solar cycle effect 901

I. Horvath and **E.A. Essex**: The southern-hemisphere mid-latitude day-time and night-time trough at low-sunspot numbers 917

M. Rao and **S.V.S. Sarma**: Solar cycle dependence of Pi2 pulsation activity in the equatorial region of India 941

O.A. Troshichev, L.V. Egorova and **V.Y. Vovk**: Evidence for influence of the solar wind variations on atmospheric temperature in the southern polar region 947

L.A. Hajkowicz: In search of the ultimate ionosonde deduced equator 957

Q. Xue, Y. Liu, L. Huang and **W. Li**: Comparison study for lightning rod and lightning eliminator. 963

Q. Wu, T.L. Killeen, S. Nozawa, D. McEwen, W. Guo and **S.C. Solomon**: Observations of mesospheric neutral wind 12-hour wave in the Northern Polar Cap 971

R.P. Kane: Periodicities of a few months in solar indices 979

Number 9

G.A. Mansilla: Disturbances at F2-region heights of equatorial anomaly during geomagnetic storms . . . 987

A.T. Karpachev and **L.N. Sidorova**: Distinction and classification of the troughs and subtroughs in He^+ density from ISS-b satellite data at 1000–1200 km altitudes 997

D.K. Sharma, J. Rai, M. Israil and **P. Singh**: Summer variations of the atmospheric aerosol number concentration over Roorkee, India 1007

H. Mavromichalaki, P. Preka-Papadema, B. Petropoulos, A. Vassilaki and **I. Tsagouri**: Time evolution of cosmic-ray intensity and solar flare index at the maximum phase of cycles 21 and 22 1021

J.E. Titheridge: Ionisation below the night *F*2 layer—a global model 1035

S. Bruinsma, G. Thuillier and **F. Barlier**: The DTM-2000 empirical thermosphere model with new data assimilation and constraints at lower boundary: accuracy and properties 1053

Number 10

M.C. Kelley, J.J. Makela, M.N. Vlasov and **A. Sur**: Further studies of the Perkins stability during Space Weather Month 1071

J.J. Makela, M.C. Kelley, S.A. González, N. Aponte and **J.J. Sojka**: Mid-latitude plasma and electric field measurements during space weather month, September 1999 1077

J.J. Sojka, D.C. Thompson, R.W. Schunk, J.V. Eccles, J.J. Makela, M.C. Kelley, S.A. González, N. Aponte and **T.W. Bullett**: Ionospheric data assimilation: recovery of strong mid-latitudinal density gradients . . . 1087

M.N. Vlasov, M.C. Kelley, J.J. Makela and **M.J. Nicolls**: Intense nighttime flux from the plasmasphere during a modest magnetic storm 1099

M.G. Iziomon, H. Mayer and **A. Matzarakis**: Downward atmospheric longwave irradiance under clear and cloudy skies: Measurement and parameterization 1107

A.A. Pimenta, J.A. Bittencourt, P.R. Fagundes, Y. Sahai, R.A. Buriti, H. Takahashi and **M.J. Taylor**: Ionospheric plasma bubble zonal drifts over the tropical region: a study using OI 630 nm emission all-sky images 1117

C. Ahn, J.R. Ziemke, S. Chandra and **P.K. Bhartia**: Derivation of tropospheric column ozone from the Earth Probe TOMS/GOES co-located data sets using the cloud slicing technique 1127

J.D. Mathews, J. Doherty, C.-H. Wen, S.J. Briczinski, D. Janches and **D.D. Meisel**: An update on UHF radar meteor observations and associated signal processing techniques at Arecibo Observatory 1139

S.G. Shepherd and **F. Shubitidze**: Method of auxiliary sources for calculating the magnetic and electric fields induced in a layered Earth 1151

V.G. Sinitsin, Y.M. Yampolski, A.V. Zalizovski, K.M. Groves and **M.B. Moldwin**: Spatial field structure and polarization of geomagnetic pulsations in conjugate areas. 1161

R.P. Kane: Fluctuations in the ~27-day sequences in the solar index F10 during solar cycles 22–23 1169

Numbers 11–13

U.K. Kalinin, A.A. Romanchuk, N.P. Sergeenko and **V.N. Shubin**: The large-scale isolated disturbances dynamics in the main peak of electronic concentration of ionosphere 1175

S. Lepidi and **P. Francia**: Diurnal polarization pattern of ULF geomagnetic pulsations in the Pc5 band from low to polar latitudes 1179

H.G. Mayr, J.G. Mengel, D.P. Drob, H.S. Porter and **K.L. Chan**: Intraseasonal oscillations in the middle atmosphere forced by gravity waves. 1187

V.M. Krasnov, Ya.V. Drobzheva, J.E.S. Venart and **J. Lastovicka**: A re-analysis of the atmospheric and ionospheric effects of the Flixborough explosion 1205

M. Wiltberger, J.G. Lyon and **C.C. Goodrich**: Results from the Lyon–Fedder–Mobarry global magnetospheric model for the electrojet challenge 1213

M. Vlasov, M.C. Kelley and **H. Kil**: Analysis of ground-based and satellite observations of F-region behavior during the great magnetic storm of July 15, 2000 1223

N. Saraf and **G. Beig**: Solar response in the vertical structure of ozone and temperature in the tropical stratosphere 1235

E.L. Afraimovich, N.P. Perevalova and **S.V. Voyeikov**: Traveling wave packets of total electron content disturbances as deduced from global GPS network data 1245

Numbers 14–15

Equatorial Electrojet Studies from Ground and Space

B.R. Arora, M.A. Abdu and **C.A. Mazaudier**: Preface 1263

V. Doumouya, Y. Cohen, B.R. Arora and **K. Yumoto**: Local time and longitude dependence of the equatorial electrojet magnetic effects 1265

B.R. Arora and **S.K. Bhardwaj**: Spatial and frequency characteristics of equatorial enhancement of geomagnetic field variations 1283

M.A. Abdu, C.M. Dinardini, J.H.A. Sobral, I.S. Batista, P. Muralikrishna, K.N. Iyer, O. Veliz and **E.R. de Paula**: Equatorial electrojet 3-M irregularity dynamics during magnetic disturbances over Brazil: results from the new VHF radar at São Luís 1293

T. Farges and **P.M. Vila**: Equatorial spread and dynamics in the F layer over West Africa from ionogram analysis, during the declining solar flux year 1994–1995 1309

P. Muralikrishna, L.P. Vieira and **M.A. Abdu**: Electron density and electric field fluctuations associated with developing plasma bubbles 1315

G.K. Mukherjee: The signature of short-period gravity waves imaged in the OI 557.7 nm and near infrared OH nightglow emissions over Panhala 1329

Numbers 16–18

S.A. Pulinets, A.D. Legen'ka, T.V. Gaivoronskaya and **V.Kh. Depuev**: Main phenomenological features of ionospheric precursors of strong earthquakes. 1337

N. Iwagami, T. Shibaki, T. Suzuki, H. Sekiguchi, N. Takegawa and **W.H. Morrow**: Rocket observations of atomic oxygen density and airglow emission rate in the WAVE2000 campaign. 1349

M.E. Gorbunov: An asymptotic method of modeling radio occultations 1361

P. Nenovski, D. Danov and **A. Bochev**: On the field-aligned currents pattern formation in the magnetosphere 1369

Ya.V. Drobzheva, V.M. Krasnov and **O.I. Sokolova**: Disturbances of the ionosphere of blast and acoustic waves generated at ionospheric heights by rockets 1385

M. Materassi, C.N. Mitchell and **P.S.J. Spencer**: Ionospheric imaging of the northern crest of the Equatorial Anomaly. 1393

M.G. Kimlin, J.M. Sabburg, A.V. Parisi and **R.S. Meltzer**: Comparison of Brewer spectrophotometer ultraviolet data from similar latitudes in the Northern and Southern Hemisphere 1401

J.S. Friedman, C.A. Tepley, S. Raizada, Q.H. Zhou, J. Hedin and **R. Delgado**: Potassium Doppler-resonance lidar for the study of the mesosphere and lower thermosphere at the Arecibo Observatory 1411

M.Yu. Ortikov, V.A. Shemelov, I.V. Shishigin and **B.V. Troitsky**: Ionospheric index of solar activity based on the data of measurements of the spacecraft signals characteristics 1425
